# 4. FIRST AID MEASURES

#### **Description of first aid measures**

Eye contact	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists: Get medical advice/attention.			
Skin contact	Wash off immediately with plenty of water. If skin irritation persists, call a physician.			
Inhalation	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If symptoms persist, call a physician.			
Ingestion	If swallowed, call a poison control center or physician immediately. Do not induce vomitir without medical advice. Never give anything by mouth to an unconscious person.			
Most important symptoms and effects, both acute and delayed				
Symptoms	Drowsiness. Dizziness.			
Indication of any immediate medical attention and special treatment needed				
Note to physicians	Treat symptomatically.			
5. FIRE-FIGHTING MEASURES				

# Suitable extinguishing media

CO2, dry chemical, dry sand, alcohol-resistant foam. Use water spray or fog; do not use straight streams. Cool containers with flooding quantities of water until well after fire is out.

Unsuitable extinguishing media CAUTION: Use of water spray when fighting fire may be inefficient.

## Specific hazards arising from the chemical

Thermal decomposition can lead to release of irritating and toxic gases and vapors. Vapors are heavier than air and may accumulate in low areas causing a fire hazard. Vapors may cause a flash fire.

Hazardous combustion productsCarbon monoxide. Carbon dioxide (CO2). Flammable/toxic gases may accumulate in confined areas (basements, tanks, hopper/tank cars etc.).

# Explosion data

#### Sensitivity to Mechanical Impact None.

Sensitivity to Static Discharge May be ignited by heat, sparks or flames.

#### Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

#### 6. ACCIDENTAL RELEASE MEASURES

#### Personal precautions, protective equipment and emergency procedures

Personal precautions	Ensure adequate ventilation, especially in confined areas.
For emergency responders	Use personal protection recommended in Section 8.
Environmental precautions	
Environmental precautions	See Section 12 for additional ecological information.

# Methods and material for containment and cleaning up Methods for containment Prevent further leakage or spillage if safe to do so. Methods for cleaning up Soak up with inert absorbent material. Pick up and transfer to properly labeled containers. Image: Conditions for safe handling The containment of the container with good industrial hygiene and safety practice. Conditions for safe storage, including any incompatibilities Keep container tightly closed in a dry and well-ventilated place. Keep away from heat, sparks, flame and other sources of ignition (i.e., pilot lights, electric motors and static electricity).

#### Incompatible materials Incompatible with strong acids and bases. Strong oxidizing agents.

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION
